

A TASTE-FIRST PROTEIN BRAND FOR INDIA

Making protein mainstream for *everyday India.*

A taste-first, value-first D2C nutrition brand turning India's protein deficiency into a mass-market opportunity — now raising growth capital.

PAN-INDIA PINCODES

30%+

MONTHLY REPEAT RATE

A category-defining brand for India's mass protein market.

The Company operates a **taste-first, value-first D2C protein foods brand** — a mass-market white space that premium, gym-oriented incumbents do not serve natively.

Every SKU is engineered to solve the "unholy trifecta" blocking protein adoption in India: poor taste, high price, and intimidating format. Shakes, chips, peanut butter, bars and cookies are priced at a lower cost-per-gram-of-protein than every major competitor.

The platform reaches India's 15-crore aspirational middle class — including deep Tier 2/3 penetration — and is scaling profitably across D2C, quick-commerce and early retail rails. It is raising growth capital to scale acquisition and switch on its highest-margin channels.

A real white-space

Premium incumbents optimise for the ~1% of India that is metro and gym-going. The Company owns the taste-first, value-first mass segment they leave open.

A low-cost growth flywheel

Two widely recognised public figures act as equity-holding co-builders, driving 50M+ monthly organic impressions and structurally low customer acquisition costs.

Rails already in place

Live pilots across India's top quick-commerce platforms, proprietary D2C purchase data across 10,000+ pincodes, and early retail/vending pilots are ready to scale.

At the intersection of a massive, underpenetrated category.

PROTEIN · NUTRITION · D2C

\$4.7bn

INDIA'S PROTEIN PRODUCTS MARKET

India's entire protein-based products market is estimated at ~\$4.7bn, with mainstream adoption still nascent.

11%

HEALTH FOOD PENETRATION

Compared to ~30% in the USA — signalling a long runway as protein becomes mainstream in India.

3.5x

FASTER CATEGORY GROWTH

Protein snacks are growing 3.5x faster than regular snacks — the fastest-growing pocket of Indian F&B.

3 in 4 Indians are protein deficient, yet the category is still served almost entirely by brands optimised for the ~1% of the country that is gym-going and metro-based. The Company is building the mass-market leader for that audience before an incumbent repositions to serve it.

01

Rising health & protein awareness

Mainstream Indian consumers are increasingly seeking everyday protein — not just gym-goers — creating first-mover advantage for accessible formats.

02

Taste-first innovation

Consumer-grade flavour science (ice-cream-like shakes, dessert-style bars) is converting protein from a "chore" product into an everyday indulgence.

03

Quick-commerce distribution

Single-serve, impulse-priced formats are purpose-built for 10-minute delivery discovery — a channel now validated with live pilots.

04

Trust-led distribution economy

In a credibility-starved category, publicly recognised, equity-holding co-builders create instant trust that paid advertising cannot buy.

Market figures are indicative, drawn from publicly available third-party industry sources for context only; they are not Company forecasts.

An "AM to PM" protein range — engineered to solve taste, price, format.

01 Protein Shakes Single-serve, ice-cream-inspired flavours (Malai Kulfis, Chocolate, Coffee, Banana) priced for trial and built for daily repeat.	02 Protein Chips India's highest protein-content savoury chip format — Peri-Peri and Cream & Onion — at a lower cost per gram of protein than any rival.
03 Peanut Butter Ice-cream-like dessert flavours — White Chocolate, Belgian Chocolate, Cookie Fudge and more — reframing a commodity category as indulgence.	04 Protein Bars Dessert-grade bars (Nutty Brownie, Mocha Boost) that taste like a treat first and a supplement second.
05 Protein Cookies The category's first soft-and-gooey protein cookie format — a newly launched, high-margin innovation line.	CERTIFIED QUALITY FSSAI FDA ISO Facility GMP 3P Lab Tested

A self-reinforcing trial-to-repeat loop

A low, impulse-priced trial pack drives first purchase; taste satisfaction converts to D2C repeat at a 30%+ monthly rate; proprietary purchase data across 10,000+ pincodes then drives cross-sell into new categories and channels — compounding LTV at a low incremental cost.

Six reasons this is a distinctive opportunity.

01 · CATEGORY CREATOR Category creator

The first taste-first, value-first protein brand purpose-built for mainstream India — a defensible white space versus premium, gym-focused incumbents.

02 · SCALED BASE Scaled & growing base

200,000+ customers across 10,000+ pincodes; gross ARR has grown roughly 24x from FY23, now running at ~₹24Cr.

03 · MASS AUDIENCE Mass-value audience

72% of sales from non-metro India; ~₹1,300 average order value across a 15-crore-strong aspirational middle-class TAM.

04 · DISTRIBUTION Built-in distribution

Co-owned and actively promoted by two widely recognised public figures with equity — structural, low-cost acquisition, not paid endorsement.

05 · CONTENT ENGINE Proprietary content engine

An in-house content studio testing 500+ creatives monthly, delivering 50M+ impressions and 3.2x+ Meta RoAS at scale.

06 · MONETISATION Owned monetisation rails

80% D2C revenue share, live quick-commerce pilots on India's top platforms, plus early retail and smart-vending distribution.

A taste-first product moat, proprietary D2C purchase data, and a trust-led content engine — three reinforcing advantages that premium, paid-media-led incumbents cannot easily replicate.

Compounding revenue growth on minimal invested capital.

AOV GROWTH, LAST 6 MONTHS

3.25x+

BLENDED ROAS

Revenue has scaled from ₹0.94Cr (FY23) to a ~₹24Cr gross ARR run-rate today, on just ₹2.5Cr of total capital invested to date — including founder and investor capital across two prior rounds.

A mass-value audience, acquired at a structural cost advantage.

COST PER GRAM OF PROTEIN · THE COMPANY vs. COMPETITION (₹)

Across every core category, the Company delivers protein to consumers at a lower cost-per-gram than incumbents — the structural basis for its mass-market positioning.

AUDIENCE BY GEOGRAPHY

- 72% Non-Metro
- 28% Metro

REVENUE CHANNEL MIX

- 80% D2C Website
- 20% Marketplace & Q-Com

D2C UNIT ECONOMICS WATERFALL (₹, PER ORDER)

Net AOV of ₹1,100 carries a 50% gross margin; after logistics and a ₹400 CAC, the order is CM2-positive at ₹30. With continued improvement in marketing efficiency and logistics, management targets CM2 expansion to ~15% within the next 1–2 years.

A multi-channel distribution engine, with the largest unlocks still ahead.

The Company monetises through owned D2C, validated quick-commerce pilots and early retail/institutional rails. Five channels are live today; the next phase scales each toward a ~₹100Cr ARR run-rate.
